Over 25 years, more than \$1.7 million has been raised to enhance care for patients at St. Elizabeth Hospital.

ST. ELIZABETH HOSPITAL
FOUNDATION

PROVIDING HOLISTIC CANCER CARE IN THE FOX CITIES HEALING THE MIND, BODY & SPIRIT

A cancer diagnosis turns your world upside down. Cancer does not discriminate – young or old, seemingly healthy or not, poor or rich in spirit. We all know someone impacted by cancer; ourselves, family member, friend, neighbor. Nearly 40% of men and women will be diagnosed with cancer at some point in their lifetimes. Cancer impacts us all.

St. Elizabeth Hospital Cancer Center – a beacon of hope

For many years, St. Elizabeth Hospital has provided an interdisciplinary approach to cancer care in an environment conducive to healing. Our care team is comprised of surgeons, medical oncologists and radiation oncologists with extensive experience in state-of-the-art cancer treatment for all types of cancers. Other members of the team include registered nurses, cancer nurse navigators, genetic counselors, cancer rehab specialists, social workers, dietitians, chaplains and palliative care clinicians. It is truly an integrated “care team”.

Donors to St. Elizabeth Hospital Foundation have a history of strong philanthropic support to fund essential needs in the Cancer Center. We are leading the way in cancer treatment, but with your help we can do more.

With your philanthropic support, we can provide holistic care to heal the mind, body and spirit, taking us to the next level in cancer care at St. Elizabeth Hospital.

Healing the Body

The Radiation Oncology services at St. Elizabeth Hospital offer some of the most sophisticated and diverse radiotherapy delivery equipment and technology on the market today. However, one crucial piece is missing - real time monitoring of patient movement during radiation treatment. The addition of the AlignRT system solves that challenge.

Over 25 years, more than \$1.7 million has been raised to enhance care for patients at St. Elizabeth Hospital.

This technology will follow the patient's movement (breathing, adjusting their body, etc) during treatment and adjust accordingly, allowing our physicians to know what's happening in real-time. Constantly monitoring the patient, the machine will turn off immediately if the tumor or affected area moves out of range.

The end result is that radiation only goes to the tumor, not the healthy tissues, thus improving long-term outcomes for cancer survivors.

Healing the Spirit

The spirit is an important and powerful mean to help heal the body. You can provide a healed spirit to cancer survivors through:

- Massage offered to cancer patients and family members.
- Essential oil courses including a sample starter kit.
- Create spa like atmosphere in the cancer rehab room (Serenity Room) for better healing.

Healing the Mind

Knowledge is powerful. Our model of care at the St. Elizabeth Hospital Cancer Care embraces shared decision making – encouraging the patient and family to actively participate in their care planning decisions. You can help to empower cancer survivors by providing them with the access to resources that will allow them to gain the knowledge and understanding of how best to be actively involved in their care and feel in control of their journey.

Examples include:

- *Be a Survivor* books for breast, lung and colorectal cancers given to every patient.
- Informational and educational Patient and Family Manual for all cancer patients.
- Providing web based education for patients and families receiving chemotherapy.
- Training and education for Cancer Center medical associates focused on specialized trainings and education to better promote holistic healing.

Holistic, Innovative, Life Changing Cancer Care

I would not be here today without the compassionate, personalized care of the entire team at St. Elizabeth Hospital's Cancer Center. I am so grateful for their support and willingness to partner with me as we navigate my treatment plan including new and innovative approaches. I know that whenever I have a new symptom, side effect, or just a question, I can contact the Cancer Center and receive responsive care through their interdisciplinary approach. I am beyond grateful for the excellent care that I am so lucky to have close to home!" Erin S.
